

We aim at helping people of all ages improve their career management skills and find career guidance services through a Europe-wide Career Skills Platform

## Our Products

### Catalogue

The Career Skills Catalogue aims to serve as a reference point for individuals and career guidance practitioners for the most essential career competencies.

### The Career Skills MOOC (massive open online course) will contain:

12 training modules that will help users develop the skills, described in the Catalogue; and a Handbook with practical tips for career guidance practitioners how to help their clients develop CMS through the platform.

### Career Skills Map

The online map of career guidance services across Europe aims to become an interactive “Yellow pages” guide for career services in Europe and increase citizens’ access to relevant career support.

### Career Skills Network

The Career Skills Network will be an online marketplace, linking career guidance professionals, policy actors and users across Europe who mutually support each other and benefit from the shared open education resources, and feedback within the community.

We aim at helping people of all ages improve their career management skills and find career guidance services through a Europe-wide Career Skills Platform
