

The Career Skills Platform

The Career Skills project approaches the end of its first year. This KA3 initiative aims at helping individuals understand, assess and develop their career management skills through a **European Career Skills Platform**. Till now the partnership has launched the English version of the Career Skills platform <https://app.career-skills.eu/> which contains:

- The [online Map of career guidance services](#) helps users find the most suitable services near-by.
- The [Career Skills Catalogue](#) explains 12 essential career management skills and allows users to assess their own level of proficiency.
- The [Career Skills Network](#) will serve for sharing news, good practices, tools and useful resources.

To validate the undertaken approach, the partners have conducted piloting research among career guidance experts and professionals in each country and have collected feedback and useful recommendations:

- *"The Career Skills Catalog is innovative in design and comprehensive."*
- *"I find the map practical and applicable from the point of view of the ever-increasing mobility of employment and training in Europe."*
- *"The modular online training course on 12 key career skills, directly related to the assessment tool, is a valuable resource in the platform."*
- *"Given that there is no unified communication network for career counselors at the national level in our country, I believe that this network can meet the needs of practitioners in the field."*
- *"Centralized source of information on interesting topics"*
- *"It is very interesting. It will serve the public very well and will immediately show the results that interest them"*
- *"It is a very practical and useful tool! Great Work! Congrats!"*

Feel free to register and use the platform, through the following link:

<https://app.career-skills.eu/index.php>

The Policy Seminars

By the end of the year, the platform will be translated in all languages and will be officially presented in **policy seminars** in each country. The event in X (country) will take place on ... (date) in ... (place/ online platform) from ... to ... (local time).

The partners will demonstrate the functionalities of the Career Skills Platform and discuss its exploitation with users.

Register for the policy seminar [here](#) (link to Google form for each country) by ... (deadline)

Career Skills MOOC

In the next 6 months, the partners will develop a **Career Skills open online course** (MOOC) which will be freely available on the platform and will help users improve their career management skills.
